1. **Status:** Please all the replies and correspondence should be addressed to Examiner's new art unit 2629. Receipt is acknowledged of papers submitted on 11-02-2007 under amendments and new claim, which have been placed of record in the file. Claims 1-3 and 5-35 are pending in this action. Claim 4 is cancelled.

Response to Amendment

2. The amendment filed 11-02-2007 does not introduce any new matter into the disclosure. The added material is supported by the original disclosure. Applicant has amended specifically independent claims 1-3, 7 and 9 by adding allowable limitation to expedite allowance of the instant application. Applicant also has amended dependent claims 31-34 and added new dependent claim 35.

3. Applicant has amended claims 1-3, 7, and 9 by adding allowable limitations to expedite allowance of the instant application. Applicant arguments filed on 11-02-2007, under remark regarding allowable limitations "a pixel portion comprising a first thin film transistor over and a switching regulator comprising: a switching regulator control circuit comprising a second thin film transistor; a switching element; an inductor; a diode; and a smoothing capacitor electrically connected to the switching element, wherein said switching regulator control circuit comprises: a voltage feed back circuit electrically connected to the smoothing capacitor and a duty control circuit which controls a switching duty of said switching element, wherein the first thin film transistor and the second thin film transistor are formed over a first substrate, and wherein the switching element is packed over a second substrate" are persuasive; as after further extensive search and consideration, the amended independent claims 1-3, 7 and 9 do overcome the prior art

rejection mailed on 08-28-2007, therefore the prior art rejection is withdrawn; which puts application number 10,687,742 in condition for allowance.

Allowable Subject Matter

4. Claims 1-3 and 5-35 are allowed.

5. The following is an examiner's statement of reasons for allowance:

Applicant has amended claims 1-3, 7, and 9 by adding allowable limitations to expedite allowance of the instant application. Applicant's arguments filed on 11-16-2007 are convincing. As argued by applicant in remarks under claim rejection pages 10, last paragraph, page 11, paragraph 1; prior art of Sakurai et al. (Pub. No.: US 2002/0175662 A1); Nakajima (US 20030011586 A1); Yanagi et al. (US 2002/0036636 A1); Sato et al. (US 5,583,424); Ishiyama (US 20050052447 A1); Tomio et al. (Pub. No.: US 2002/0044145 A1); Ayres (Pub. No.: US 2001/0007432 A1); Yu (Pub. No.: US 2003/0201967 A1) and Muthu et al. (Pub. No.: US 2002/0145041) with all of the other prior art cited on 892's 1449's, searched in NPL and searched in PGPU, fails to recite or disclose all the other limitations of independent claims in combination with uniquely distinct features represented by underlined bold claim limitations recited below;

a pixel portion comprising a first thin film transistor over and a switching regulator comprising: a switching regulator control circuit comprising a second thin film transistor; a switching element; an inductor; a diode; and a smoothing capacitor electrically connected to the switching element, wherein said switching regulator control circuit comprises: a

voltage feed back circuit electrically connected to the smoothing capacitor and a duty control circuit which controls a switching duty of said switching element, wherein the first thin film transistor and the second thin film transistor are formed over a first substrate, and wherein the switching element is packed over a second substrate.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
